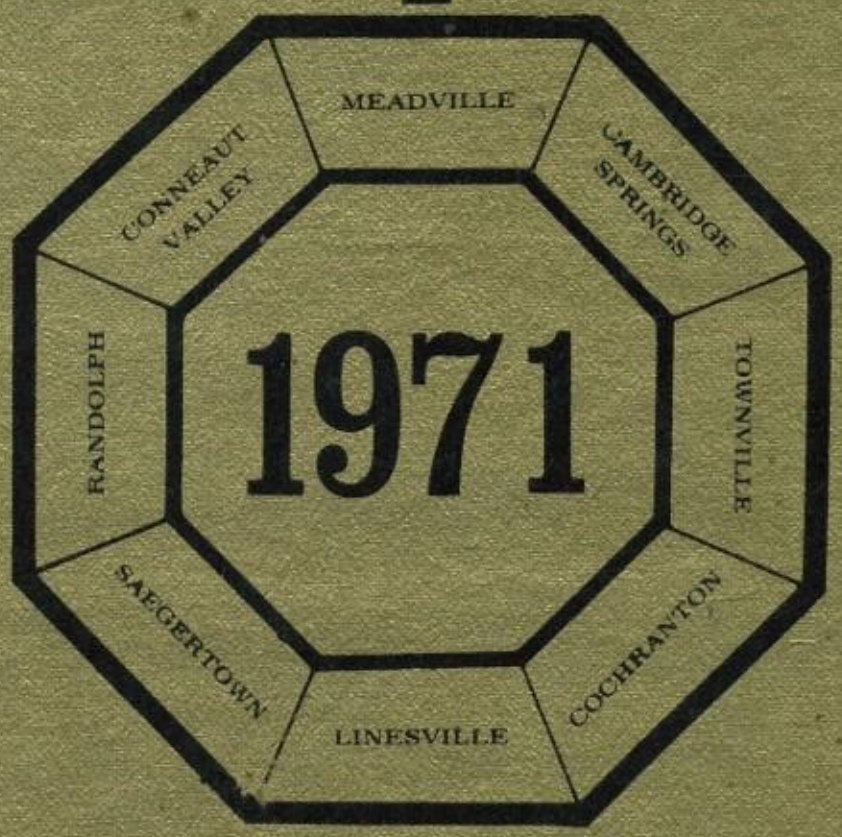
COUNTIAN 1971



CRAWFORD COUNTY AREA
VOCATIONAL TECHNICAL SCHOOL

Mr. Jenny

To one of the nicest teachers I ever had. I'll never forgot the good times in the class. Lots of luck in the future. Hope you don't get any more like me

Jim "71"

Mr. Jenny

To a cool teacher who put up with the class of "71" who I don't think you'll ever forget. Have fun in the future.

Dave Rydbom
'71

Mr. Jenny

To a real good teacher,
Who can put up with the seniors.

David Baird

Mr. Jenny -

To my favorite teacher,
I'm really gonna miss Mr. Jenny
I'm glad there are a few neat-o
teachers around. How does it
feel to be no. 1?

Luv ya
Becky '71'

Mr. Jenny,
Thanks for all the
good times.
'71
Good luck in
the future.

Chuck

Ted,

To a real good
teacher who I will
always remember
for the good times
we had in Drafting
class.

Kim Kinig

Ted,

To a good teacher,
comradeship + philosophy

Tom

Mr Jenny

To one of the best and
nicest teachers I ever had

Mike

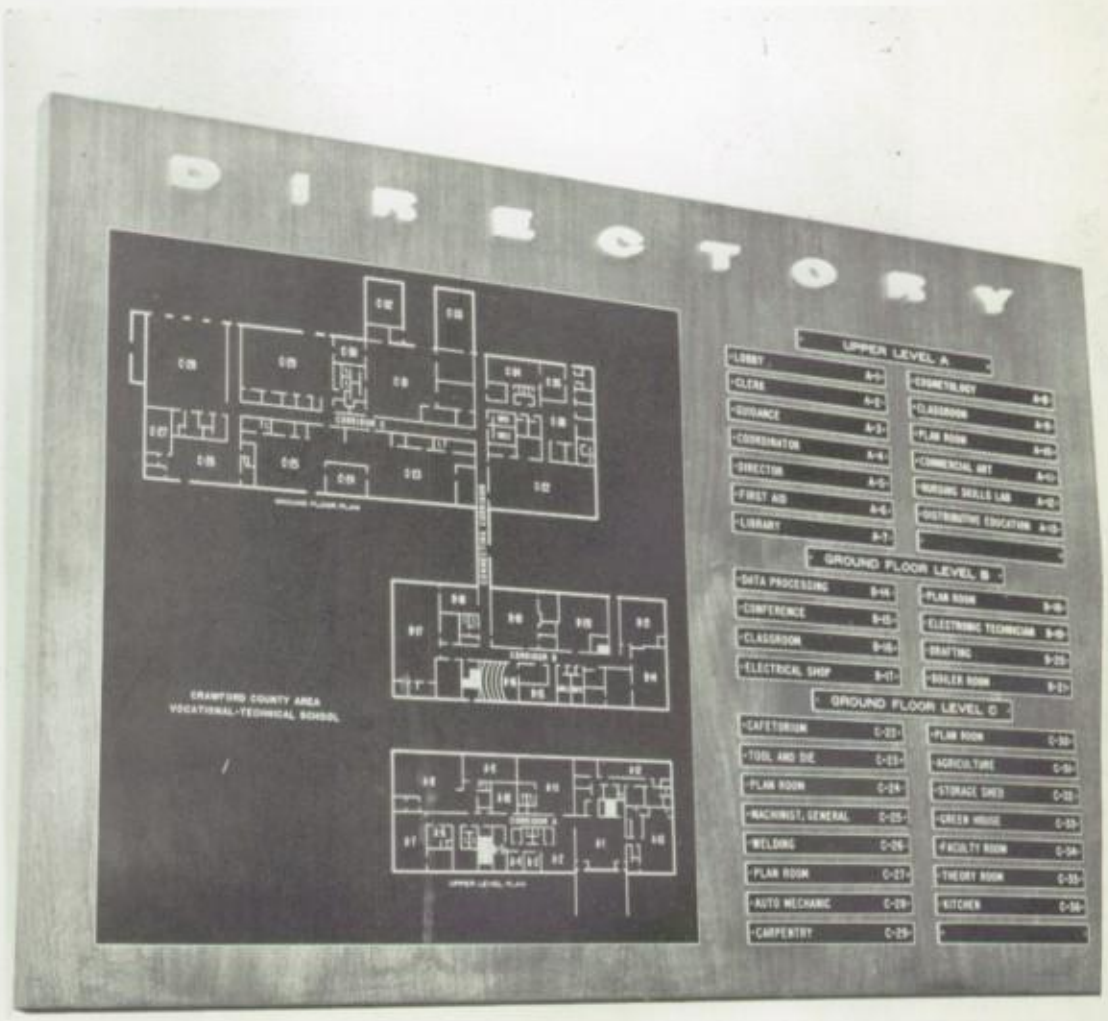
Vocational-Technical School
Meadville, Pennsylvania
Volume No. 2



County Superintendent

Our new building represents a tangible evidence of growth, of progress and of committment to the future. Even as we concerned ourselves with your needs and your opportunities, we were planning and building for the students yet to come. CCVTS is a better school for your having been here. Whether or not you are a better person for having been at CCVTS, you, and all who feel your influence will soon know. I feel certain that you are. I salute the Class of 1971 and wish you well in all that you may do.

A. R. Moon, County Superintendent

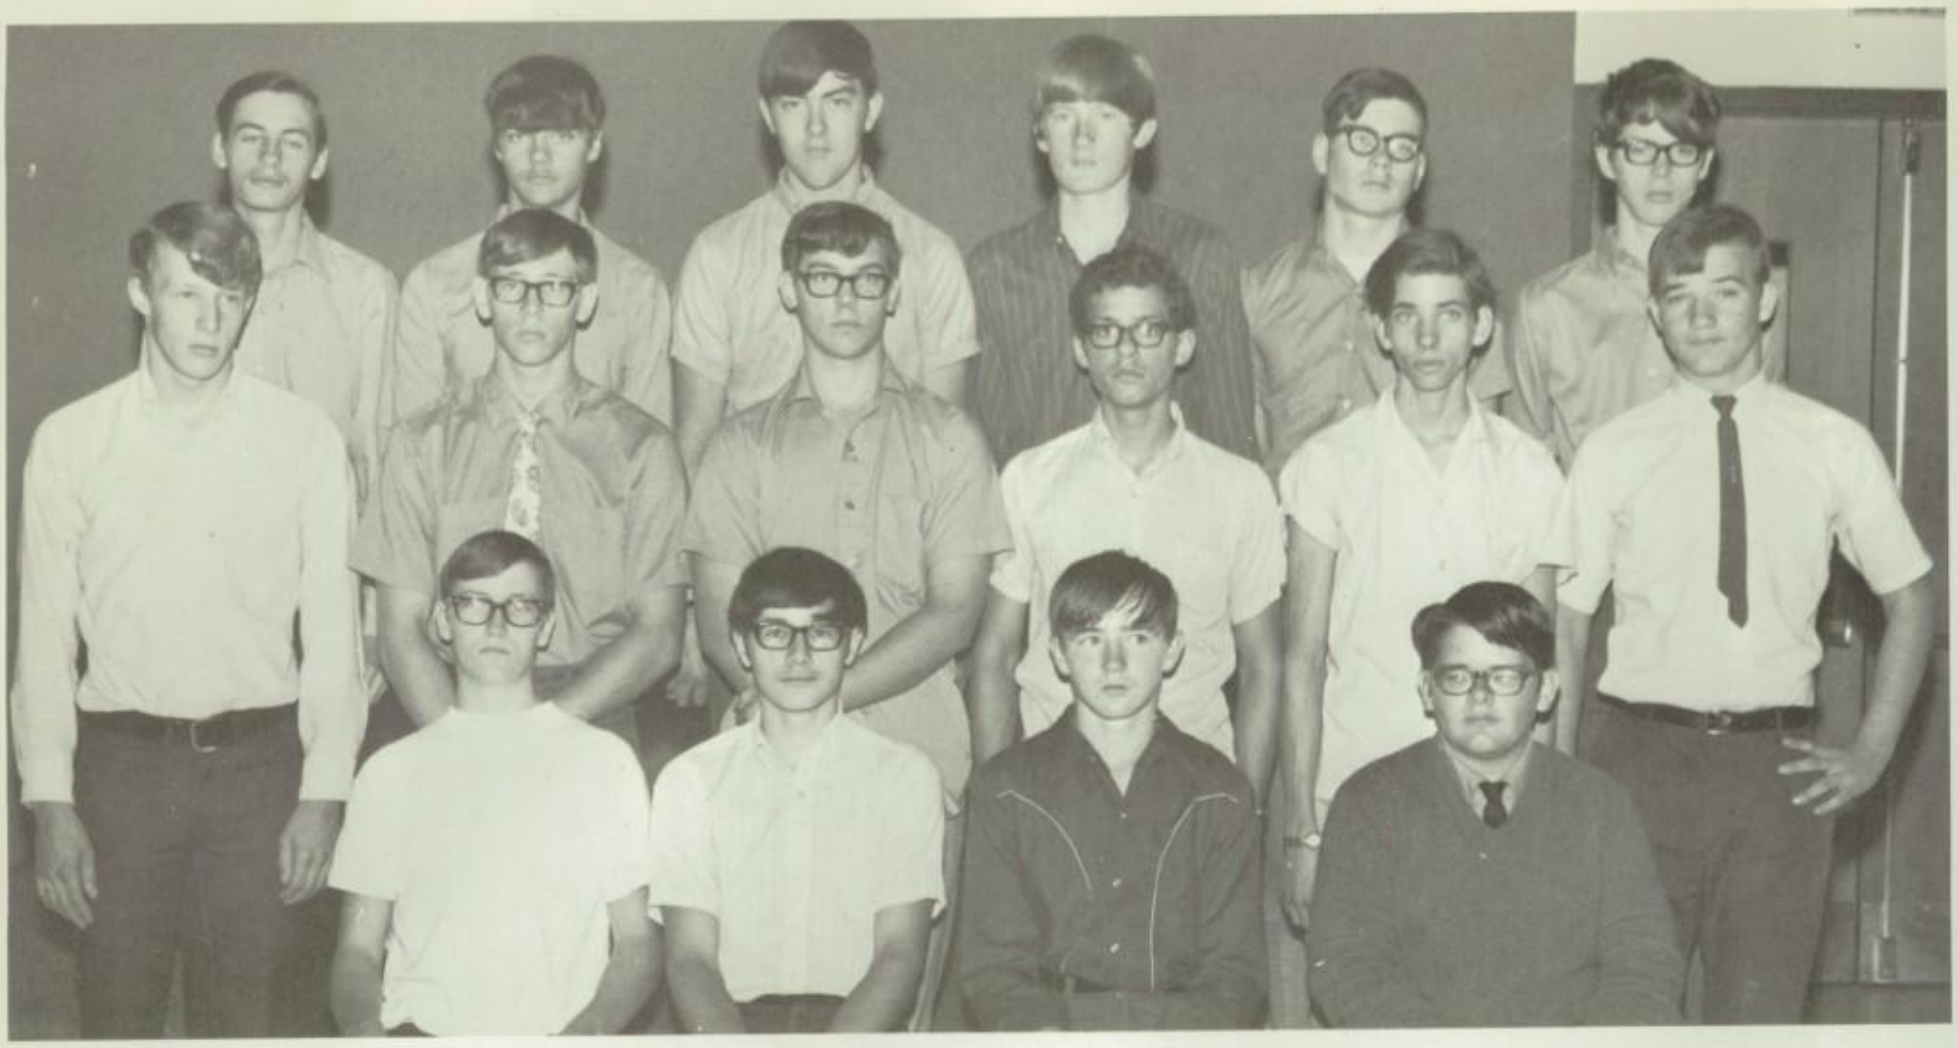
Agriculture Business

This course includes training in ornamental horticulture, implement repair and maintenance, and turf management.

The ornamental horticulture section will be concerned with the subject matter and learning activities in production, sales and services in greenhouses, nurseries, and garden centers.

The implement repair section will consist of the learning activities necessary for students to study principles and processes dealing with the maintenance and repair of farm equipment such as small gasoline engines, farm tractors, and other power tools. Also included would be the many and varied non-powered implements used on the farm.

A.M. Section



Seated: James Rhodes, Bill Rowland, Roy Kennedy, Larry Newhand, *Row II:* Ralph Loper, Karl Kolacek, Dennis Winieke, Gary Praisner, Terry Smith, Lawrence Gilson, *Row III:* Paul Daly, Don Burchard, Frank Schropp, John Campbell, John Chamberlain, Steve Holtzhauser, *Not Pictured:* Bill Britton, Richard Davis, Joe Koeler, Charles Bixby, Ted Rung

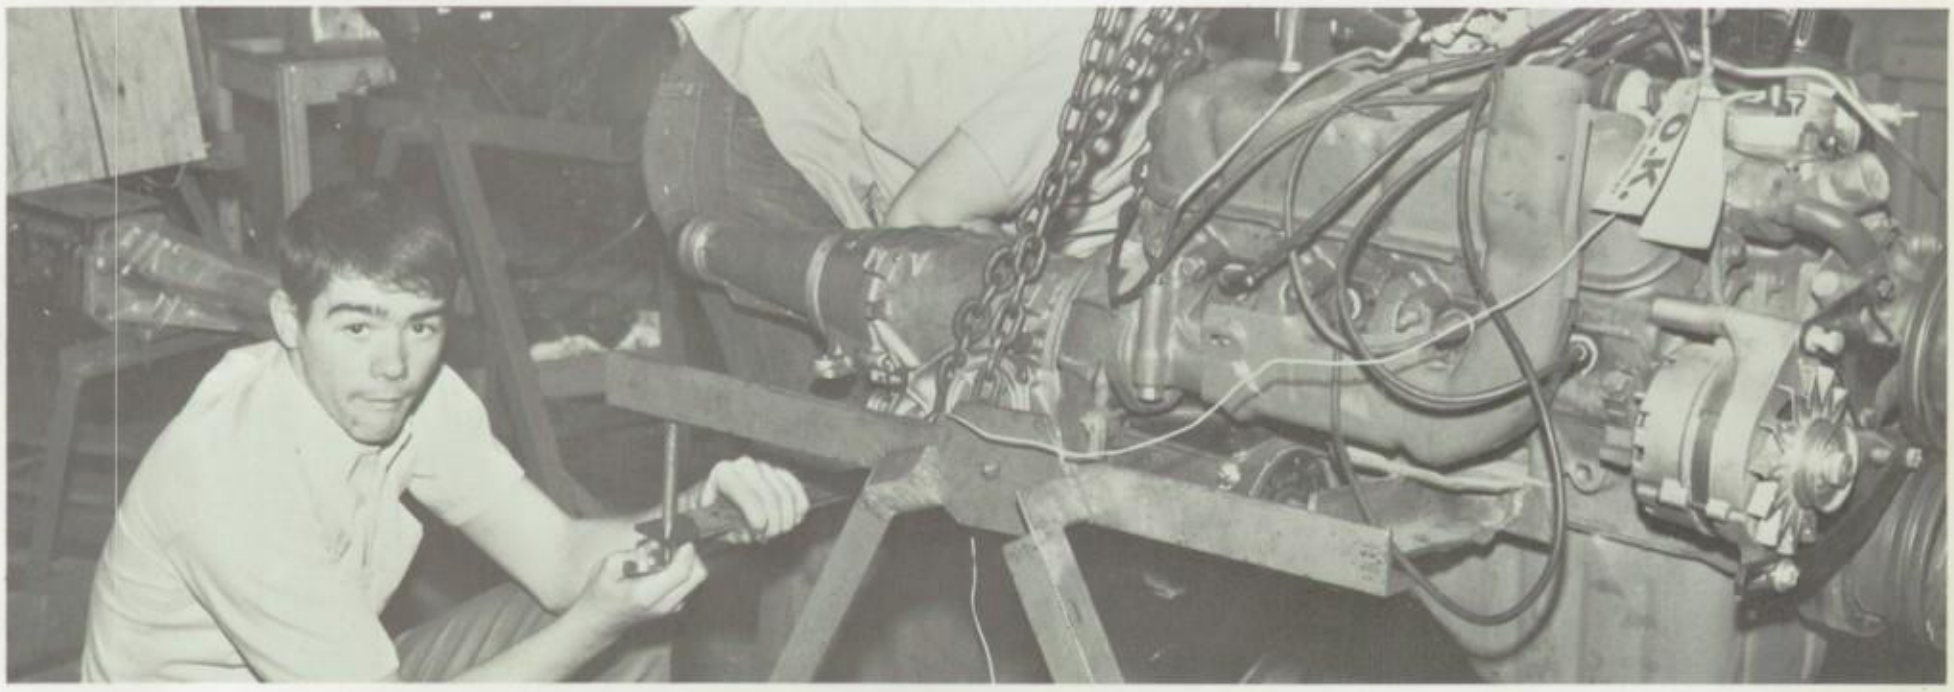
Auto Shop

The automotive mechanics course provides the student with practical instruction in the diagnosis, repair and adjustments of all phases of automotive mechanics. Instruction is given on the use of up-to-date equipment used in analyzing carburetion, ignition, electrical controls, braking systems, and front end alignment. Special emphasis is given to trouble shooting, motor tune-up, and complete overhaul of engines by replacing rings, bearings, valves, gaskets, and other worn parts.

There are unlimited opportunities for employment in the wide range of automotive fields including cars, trucks, diesel driven heavy equipment, and in the related fields of sales and service.



A.M. Section

Seated: *Don Andrews, William Schaeffer, Philip Davenport, Rick Goodwill, Pan Byers, Paul Strawbridge, Glenn Radicella, *Row II:* Dan Saeger, *William Mitchell, William Houy, *Edwin Yucha, Milton Kidon, Tim Leguard, *John Spangler, *Row III:* Bruce Johnson, Ted Larson, *Doug Turner, *Rick Stallard, Howard Foltz, Charles Potter, Carl Wombacker

Carpentry

The carpentry unit of the course gives actual experience in lay-out, cutting and fitting building structures, rafter cuts and roof framing, and general building materials. Special emphasis is given to blueprint reading and material estimating.

The millwork unit of the course covers the use of machines and power tools used in making cabinets, door frames, doors, stair parts, trim moldings, and decorative parts used in construction work.

This is a curriculum designed to prepare the student for the largest single construction trade from the standpoint of extent of work and number of workers. This course offers instruction in the use of all hand and power tools including the machinery used for millwork. Foundation layouts, forming, rafter framing, roofing and siding, lathing, finish trim, grading, measuring, and identification are just a few of the course points offered.

Commercial Art

Training in this field is not for the casual individual, but designed for the serious person desiring to enter one of the following fields as a career: illustrator, advertising artist, layout artist, lettering artist, sign painter, display artist, silk screen artist, technical illustrator, medical illustrator, fashion designer, as well as many other related fields. The following represents some elements of training: pen and ink techniques, technical illustrating, still life drawing, sketching anatomy elements and principles of design, illustration, block printing and silk screen printing, and layout.

A.M. Section

Seated: Cindy Ferraro, Mary Powell, Debbie Troutner, Patti Lilly, Donna Simmons, Darleta Archer, Jessie Baker, *Row II:* Lola Carpenter, Becky Conner, Sherrie Bishop, Peggy Delp, *Waunita Miller, Cheryl Moretti, Mary Sargent, Joyce Parker, *Row III:* Vernita Hall, Debbie Householder, Dina Stainbrook, Roberta Hart, Cathy Clingensmith, Margie Wolfgang, Dawn Cleary, Barbara Campbell, *Not Pictured:* Taffy Caldwell

Cosmetology

Instruction is provided in cutting, shampooing, tinting, bleaching, dying and coloring hair. Make-up analyses, superfluous hair removal, styling eyebrows, and giving manicures are part of the course.

Students can obtain a state license through the State Cosmetology Board Examination to be eligible for employment in a variety of services related to the care of the hair or establish self-owned businesses.

A.M. Section

Seated: Vivian Butts, Kathy Patton, Connie Petty, Linda Gamble, Mary Lou Barickman, Darlene Groshner, Selena Simon, *Row II:* David Frazier, Bryan Scott, Irene Fheuret, Linda Katenbaugh, *Ruth Gandelot, Dan Davis, Jerry Skalko, *Row III:* Roger Bromley, Steve Peterson, Tim Tenon, John Lindsey, Steve Smith, Terry Wood

P.M. Section

Seated: Larry Watson, Karen Kaltenbaugh, Diane Curry, *Pat Atrozskin, Sue Sorger, *Marcia Yarnell, *Row II:* *Kathy Getchell, *Sandy Payne, *Darlene Conner, *Lorraine McWilliams, *Linda Williams, *Cathy Hogue, *Denna Davis, *Row III:* Mark Blanchard, Sara Hospodar, Paula Brown, Sue Amos, *Roger Gage, Lynda Krouse, *Barb Gustafson, *Karen Overton, *Not Pictured:* Cinday Winsor

Data Processing

To provide instruction in the operation of the IBM 24 Card Punch, the IBM 26 Card Punch, the IBM 29 Card Punch, the IBM 59 Card Verifier, the IBM 82 Sorter, the IBM 85 Collator, the IBM 548 Interpreter, the IBM 514 Reproducer/Summary Punch, the IBM 402 Accounting Machine, the MINIDAC, the Digital Computer, Computer Mathematics, Boolean Algebra, Symbolic Logic, the Slide Rule and Basic Electricity. To provide students with instruction about the internal and external functioning of the UNIVAC 9300 Computer System and with knowledge enabling them to plan, program, test, and produce jobs with RPG and Fortran IV Programming Languages. To provide instruction about more complex and board wiring of the 85, 514, 402, and 548.

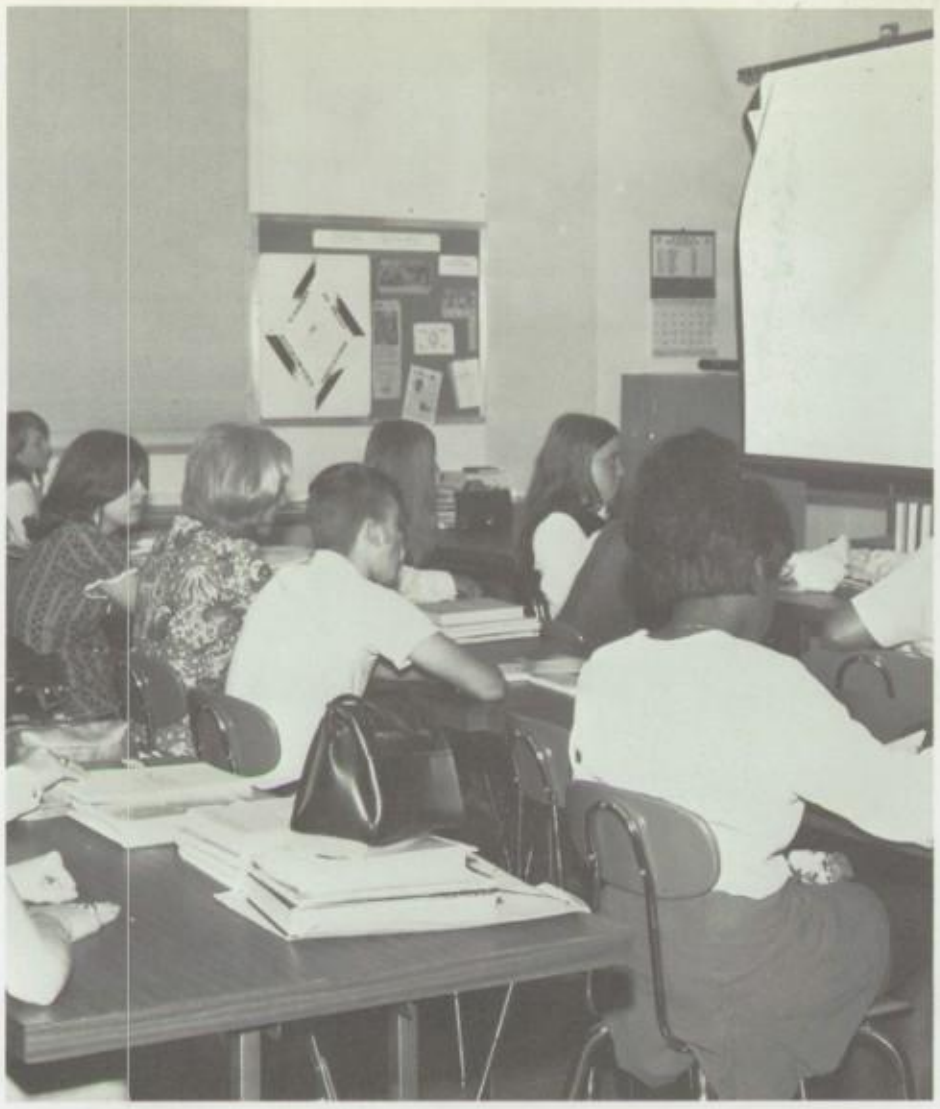
To provide students with further knowledge enabling them to plan, program, test, and produce jobs with Fortran IV and COBOL Programming Languages. To provide instruction in setting up systems for a Unit Record Section and a Computer Section, and relating their systems work to education and business.

A.M. Section

Seated: Colleen Powell, *James Loper, Barbara Hull, Mary Spangler, Merle Castile, Brenda Thompson, Paula Bossard, *Row II:* Jackie Sosnowski, Kathleen Furlong, Janet Porfilio, Karen Sterling, Dawn Gruber, Patricia Uhlman, Trudy Sutliff, *Row III:* Patricia Peterson, Aleda Jenkins, Frank Weingard, James Cooper, Carol Englehardt, Joyce Smith, Beatrice Shreffler

P.M. Section

Seated: Judy Salsberry, Jerome Terri, *Tina Alexatos, Erba Peterson, *Diane Fenton, Judy Spratt, *Row II:* *Vilma Allers, *Janet Ellis, *Cecilia Pittsenbarger, *Patty Taylor, Linda Rudler, *Mabel Williamson, Margaret Braswell, *Row III:* Anna Lindsey, Susan Fera, *Margaret Orlasky, *Mike Samuels, Dorothy Weaver, *Debbie Phelps, *Anna White



Distributive Education

Distributive Education provides a program which prepares students for marketing, merchandising, and management.

The Distributive Education course is primarily a two year program. In the first year theory is studied in areas such as Salesmanship, Advertising, Retail Mathematics, Store Operation, Interior and Exterior Display and Merchandise Information. Students operate a school store in its entirety. The second year consists of a co-op program where the student is employed in a distributive occupation during the afternoon applying this theory with on the job training.

Another important segment of developing leadership is the Distributive Education Clubs of America known as DECA. This has proven to be of great value in preparing students in the field of distribution.

A.M. Section

Seated: Steve Newhard, Larry McBryar, Dick McAlevy, Bernie Blystone, Don Owens, Jim Baker, Andy Overton, *Row II:* *Tom Vanco, Dan Bidwell, Dennis Wolff, Bob Nageotte, Jeff Forbes, Wayne Schlosser, Doug Haines, Ray Thomas, *Row III:* Dave Richards, Bob Marr, *Tom Hanna, Dave Hogue, Bryan Phillips, Don Hughes, Keith Abbott

Mr. J.
To a cool teacher. RMA.
Norm

Drafting

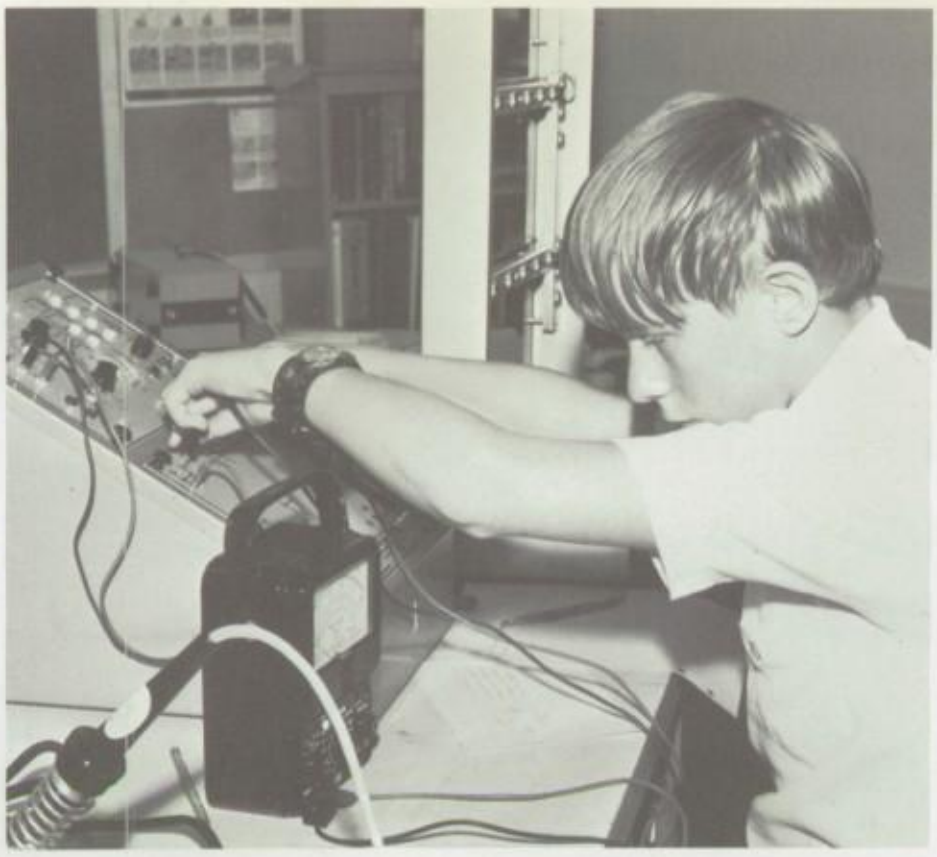
This course will provide a broad and thorough knowledge of the principle methods by which draftsmen, designers, engineers, and other technicians in the field express ideas to the craftsmen who fabricate the items used in everyday life. Work in this course will give the student an opportunity to develop the necessary technical skills in the use of instruments, tools, and equipment used to produce and reproduce drawings, sketches, and blueprints. Emphasis is placed upon acquiring the necessary technical knowledge to be able to orally, graphically, mathematically, and scientifically translate the ideas of the engineer, the technician and the tradesman into a practical graphic language.

A.M. Section

Seated: Scott Nicols, Bill Copeland, Allen Peterson, *Row II:* Rodney McCrea, Randy Shaffer, Steve Ashe, Bob Wachowiak, *Raymond Jones, *Row III:* Frank Ross, Dan Southworth, *Philip Bradley, Larry Merritt, *Harvey Gilbert, *Randy Humes

P.M. Section

Seated: Richard Locke, Rose Yoder, Charles Gee, *Row II:* *Rich Styborski, *Chris Boughton, Glenn Higby, Steve Pruskowski, Mark Allen, *Row III:* *Richard Randolph, *Larry Roland, *Rich Johnson, *Tom Owens, *Allen Jacobs
(*) Denotes Seniors



Electronics

This field includes work in audio systems, electronic communications, radio, radar, electronic navigation, television, industrial control and automation, recording and measuring devices, digital and analog computers, and other devices employing vacuum tube and semiconductor circuits. The electronic technician is employed in all of these areas, installing, maintaining, operating, repairing or constructing the equipment.

A.M. Section

Seated: Diane Eddy, Karen Matteson, Mary Jo Martin, Judy McHenry, Debbie Johns, *Row II:* Wanda Wilhelm, Tom Burns, Linda Burchill, Judy Ray, *Keith Thompson, *Row III:* *Shirley Sherman, Debbie Yoder, Darlene Jenkins, Ron Yuchum, Linda Willison, *Not Pictured:* Lois Ender, Tom Barickman, Tim Saulsbery, Marty Millard, Geraldine Edwards

P.M. Section

Seated: *Sandy Smith, Diane Ferguson, *LuAnn Sutter, *Nancy Butler, Nancy Pusbach, *Row II:* *Deanne Stiner, *Karen Carpenter, Bette Jo Powell, *Nancy Malliard, *Elaine Carrara, Wanda Moore, *Row III:* *Sally McCaslin, *Randy French, *Jean Ganster, Maxine Stetson, *Sandy Harvey, *Susan Norr, *Not Pictured:* Ellen Ausmundson, Janice Dunton, *Linda Lippert, *Linda Smith, *Judy Wachowiak, Jeff Wensel, *Sally McCaslin

Food Preparation

Instruction will be given in all areas of restaurant work in this course. The course will include study in the following areas: cooking, baking, salad making, preparation of foods, table setting, power equipment operation, serving, dish washing, cashier, hostess, equipment and building maintenance, purchasing, menu planning and management. Each student chooses his own field of specialization.

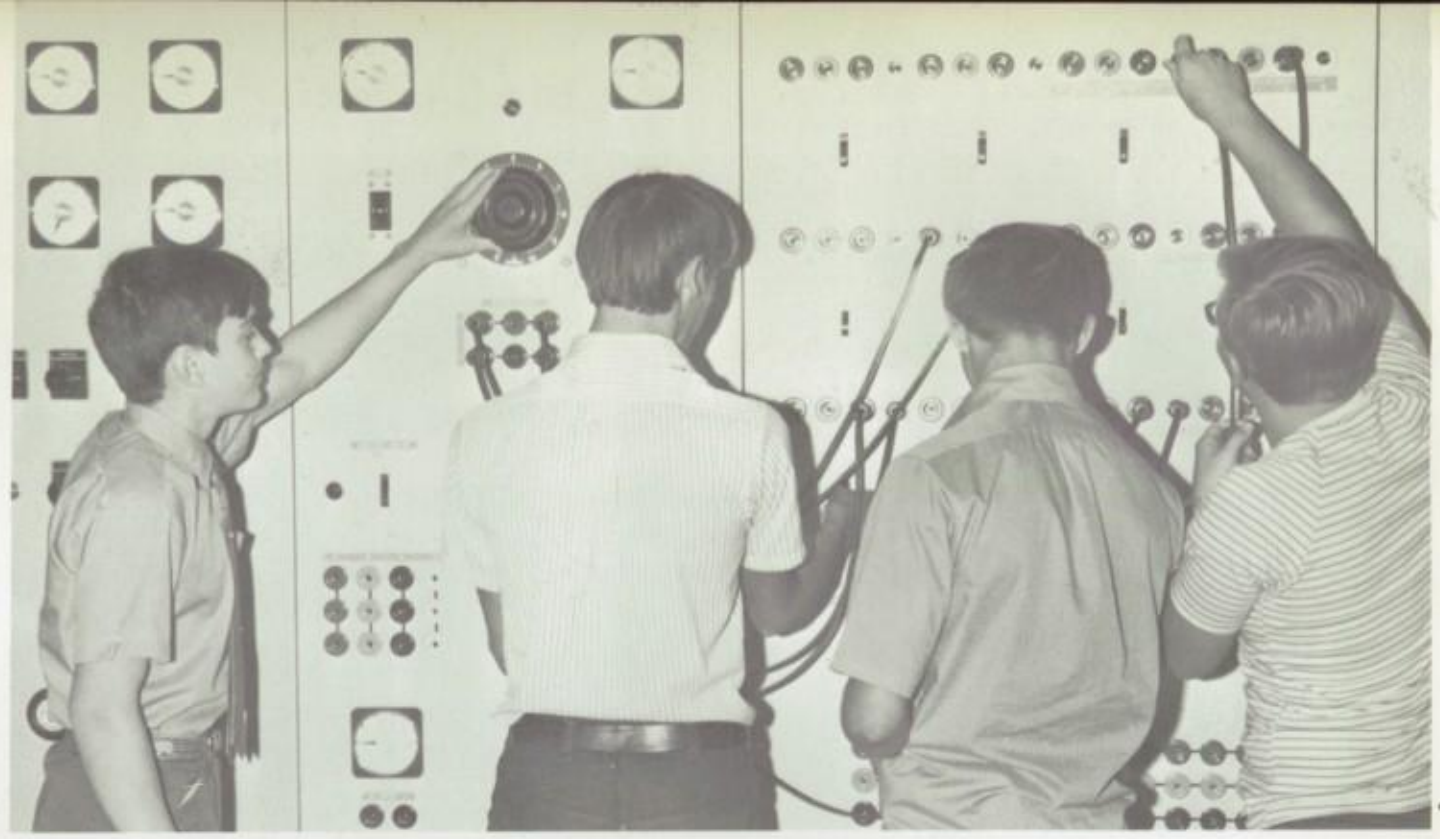
Practical experience in all of the above areas will be afforded the student in the cafeteria-restaurant practice room.

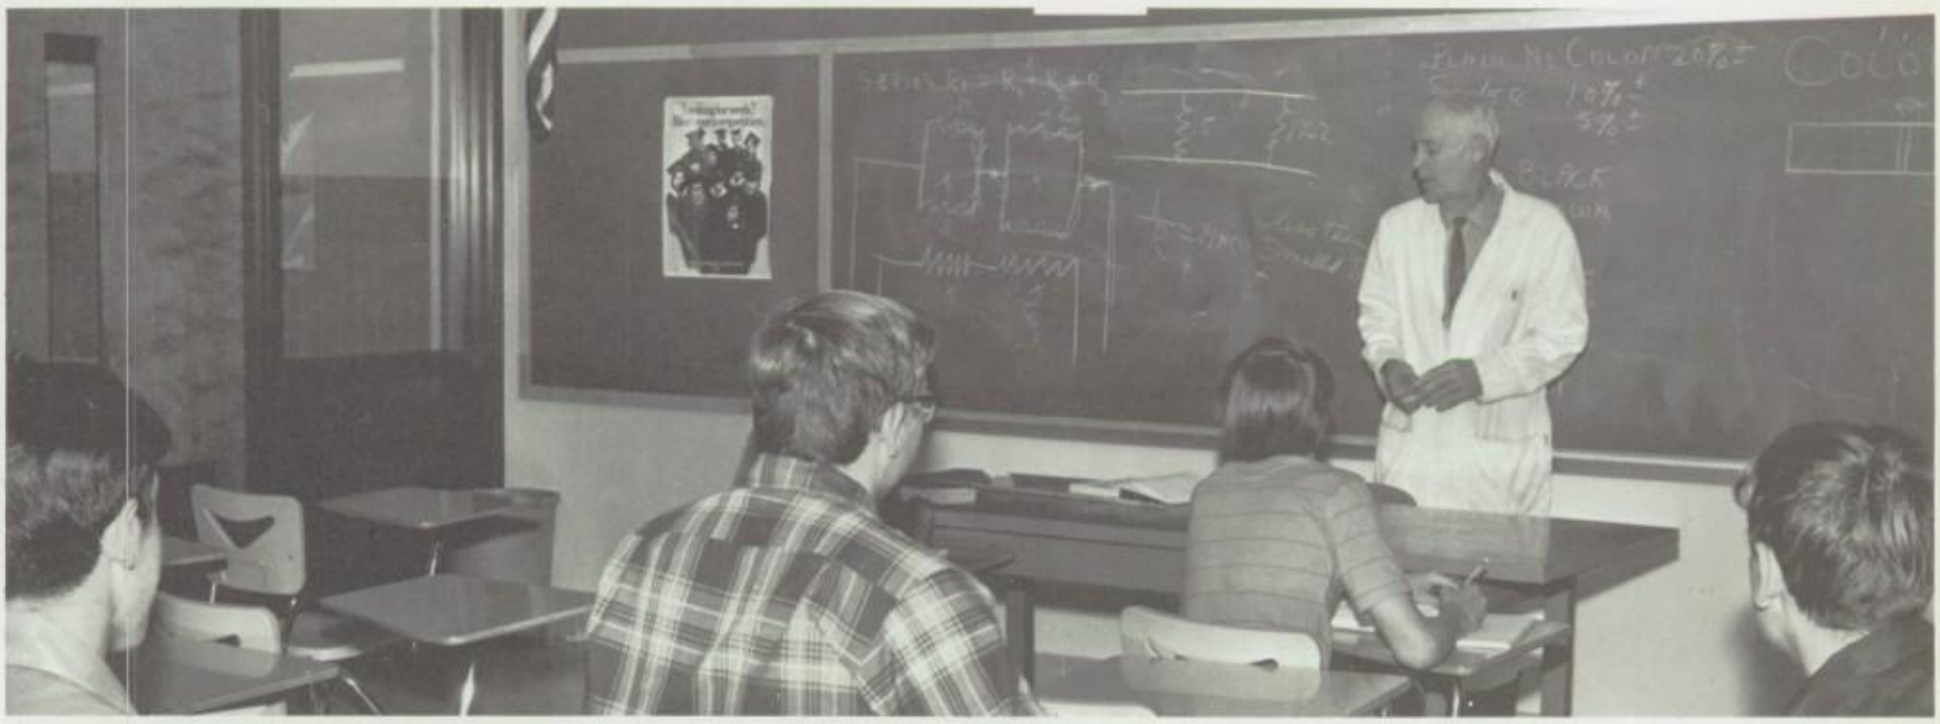
A.M. Section

Seated: Michael Forbes, William Seeley, Tim Barrickman, Steve Hagerty, Walter Hamilton, *Row II:* Robert Allen, William Deeler, David Cotterman, Lane Lobdell, Douglas Steadman, William Dittkich, *Row III:* Bruce Atwell, Dave MonteFonte, Dan Bookamer, Dale Morehead, John Morda, Randy Pratt, Dave DeWoody, *Not Pictured:* Brian Richmond

P.M. Section

Seated: Terry Dennis, Mark Mimore, Ken Twombley, Warner Getchell, Terry Bechtel, Ralph Woge, *Row II:* Dave Barickman, Lester Bailey, Arnold Clark, Neil Bradshaw, Brian Counselman, William Ransom, Anthony Tedesco, *Row III:* Michael Walk, Fred Wenzel, Randy Neidermeyer, Gary Bosco, Lyle Hathaway, Mike Fickes, *Not Pictured:* Tim Hagerty, Dave Gill, Donald Mook, William Bowman, Kris Kennedy

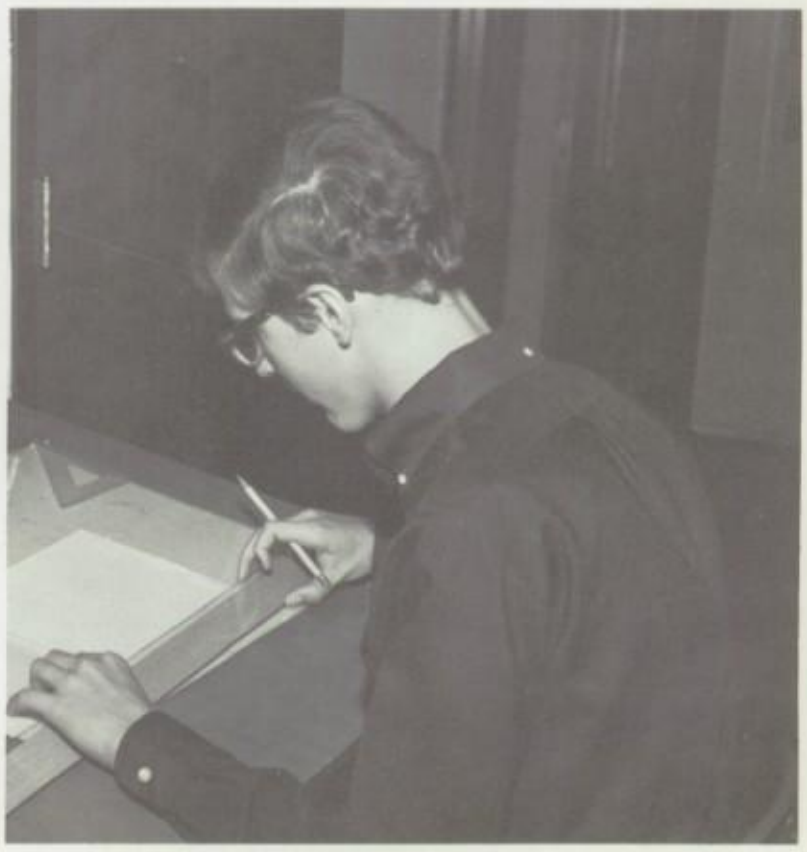




Industrial Electric

The course includes training in layout, assembly, installation, and testing of apparatus and wiring used in heating, lighting, power, air-conditioning, refrigeration, and other electrical systems for residences, factories, and other buildings. A part of the course is devoted to re-winding motors, coils, and controls used in factory automation.

Classroom work includes electrical principles and theory, diagram and blueprint reading, estimating for equipment repair and building wiring, and electrical code requirements.

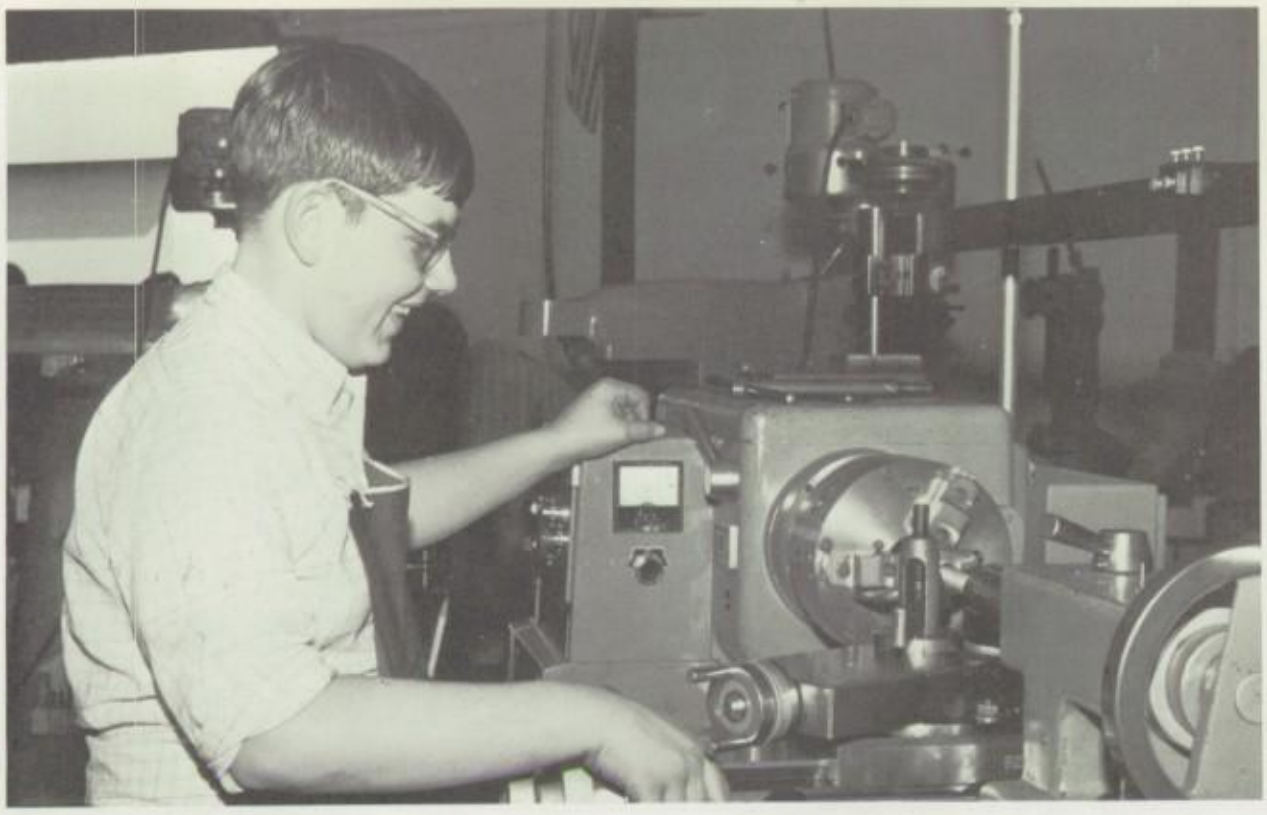


A.M. Section

Seated: Dan Hassett, Scott Dewey, Joe Dragosavac, Don Faivre, Mark Simmons, *Row II:* Dale Hunter, Bob Gilbert, Dave Varner, Rick Pechin, Randy Kidon, Scott Warden, *Row III:* Mike Shannon, Dave Pierce, Rahn Hill, Jim Callahan, Mike Walker, Tom Tessmer, Dennis Gamble, Kim Curtis

P.M. Section

Seated: Michael Rogan, William Dinger, Charles Lyda, Gary Miklovic, John Gustafson, Kenneth Siverd, William Kedzierski, *Row II:* Mark Evans, Mark Jordon, William Wellmon, Arlen Culp, Jeff Hills, *Michael Smith, Jack Egli, *Row III:* *Don Lindsey, Reid Rounds, Richard Stevenson, Kenneth Main, James Lowing, Jay Palmer



Machine Shop

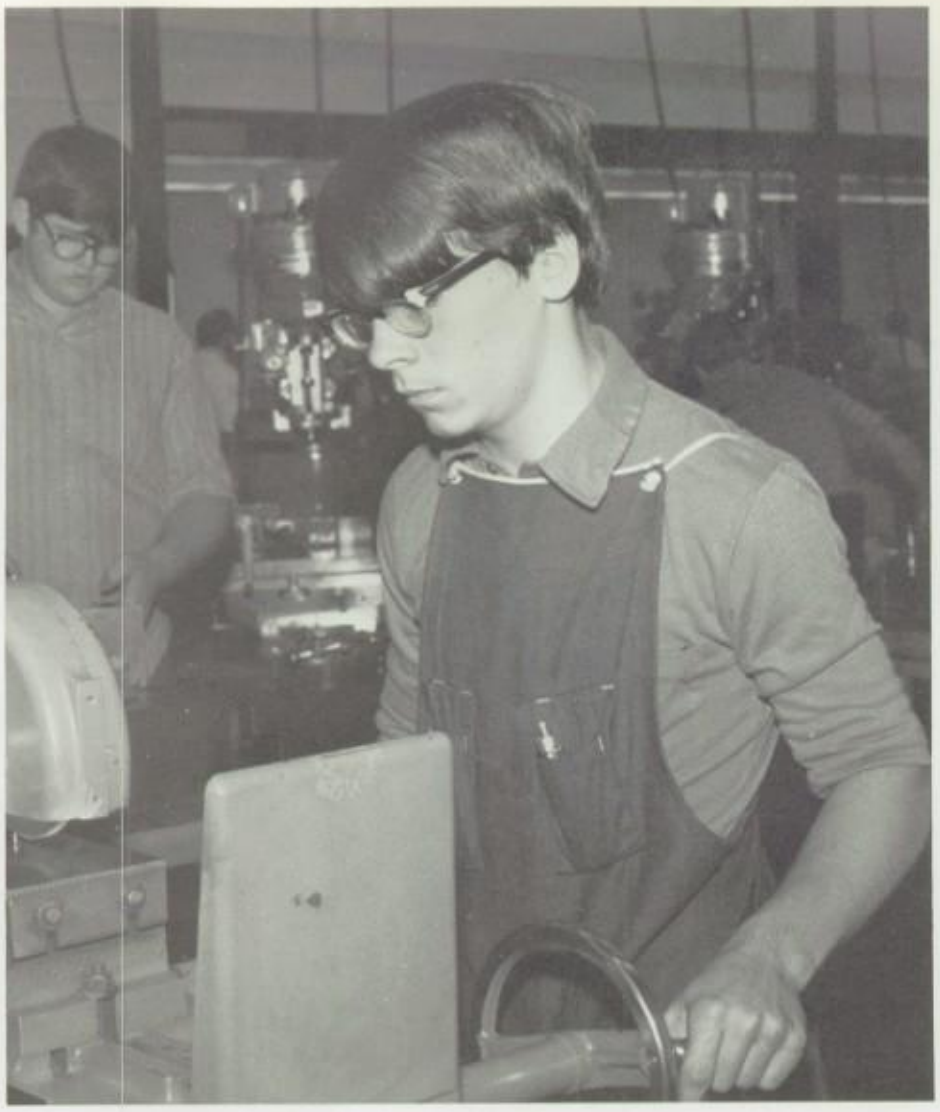
The curriculum is designed to prepare the student as an all-round machinist. Instruction is provided in setting up and operating industrial type metal-working machinery. This course will also offer to the advanced student the opportunity to develop precision of accuracy and measurement and production of metal parts through the use of dial controlled equipment. Working from blueprints and written specifications, the student will develop accuracy on the full variety of industrial type machine tools. A knowledge of metals is also part of this course.

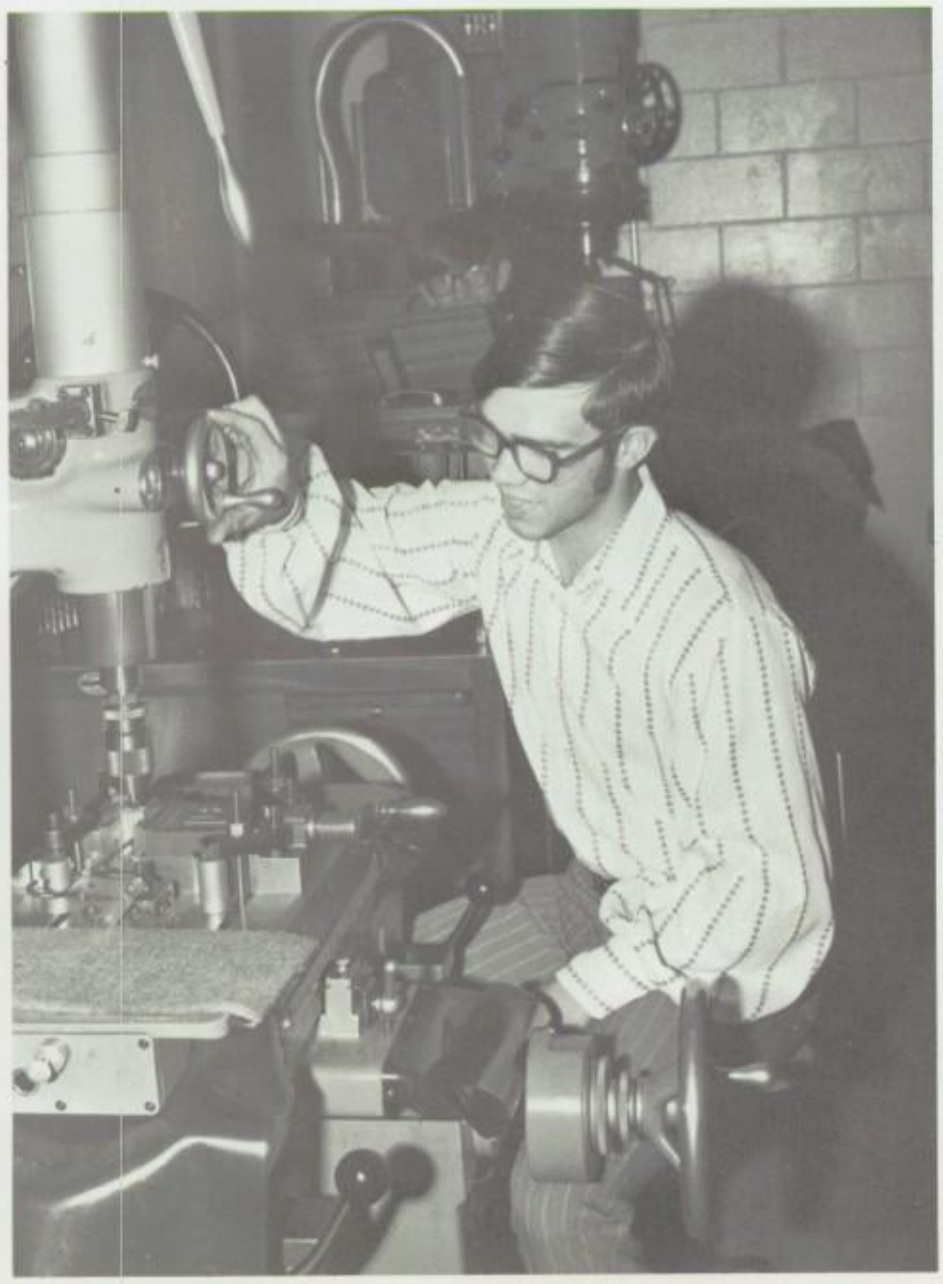
A.M. Section

Seated: Don Williams, Dan Shea, *Doug Hall, Richard Locke, *Ed McAlevy, Earl Tenney, *Row II:* Bob Mondack, Walter Curry, Darwin Hamilton, Michael Acker, Kim Wallace, Mike Maloney, *Row III:* Bob Pruskowski, Roger Ghering, *Neal Britton, *William Hunter, Bill Bossard, Mark Lubiniecki, *Not Pictured:* *Ernest Bernier

P.M. Section

Seated: *Larry Porter, Richard Blackhurst, *Dale Brown, *Don Smith, *Kelly Boyd, Mark Donahue, *Row II:* Terry Faiure, *David Foriska, *Jim Randolph, *Richard Scull, Rodney Castile, *Marvin Hamilton, *Paul Bleasdale, *Row III:* *Ray Wagner, *Kevin McCartney, Chuck Anderson, *George Walters, Albert Howick, James Starcheski, *Dale Robbins





Tool And Die

In this course the student will develop a broad knowledge of machining operations, shop practices, mathematics, blueprint reading and development. He will learn to work to very close tolerance and do more precise handwork than most other machining work. He will learn the use of many types of machine tools and precision measuring instruments. The student will be instructed in working with all metals and alloys commonly used in manufacturing. Heat treating and other metal processes are also taught.

A.M. Section

Seated: Russell Stein, Dale Webster, Donald Bourgeals, Jeff Brown, Daniel Butcher, *Row II:* Al Shay, Stanley Niwa, Joseph Young, John Clinger, Nathan Batchelor, Melvin Webster, Richard Nichols, *Row III:* James Furry, Robert Peters, Joseph Wood, Donald Tarr, John Stolee, Wray Beiter, James Spanogle

P.M. Section

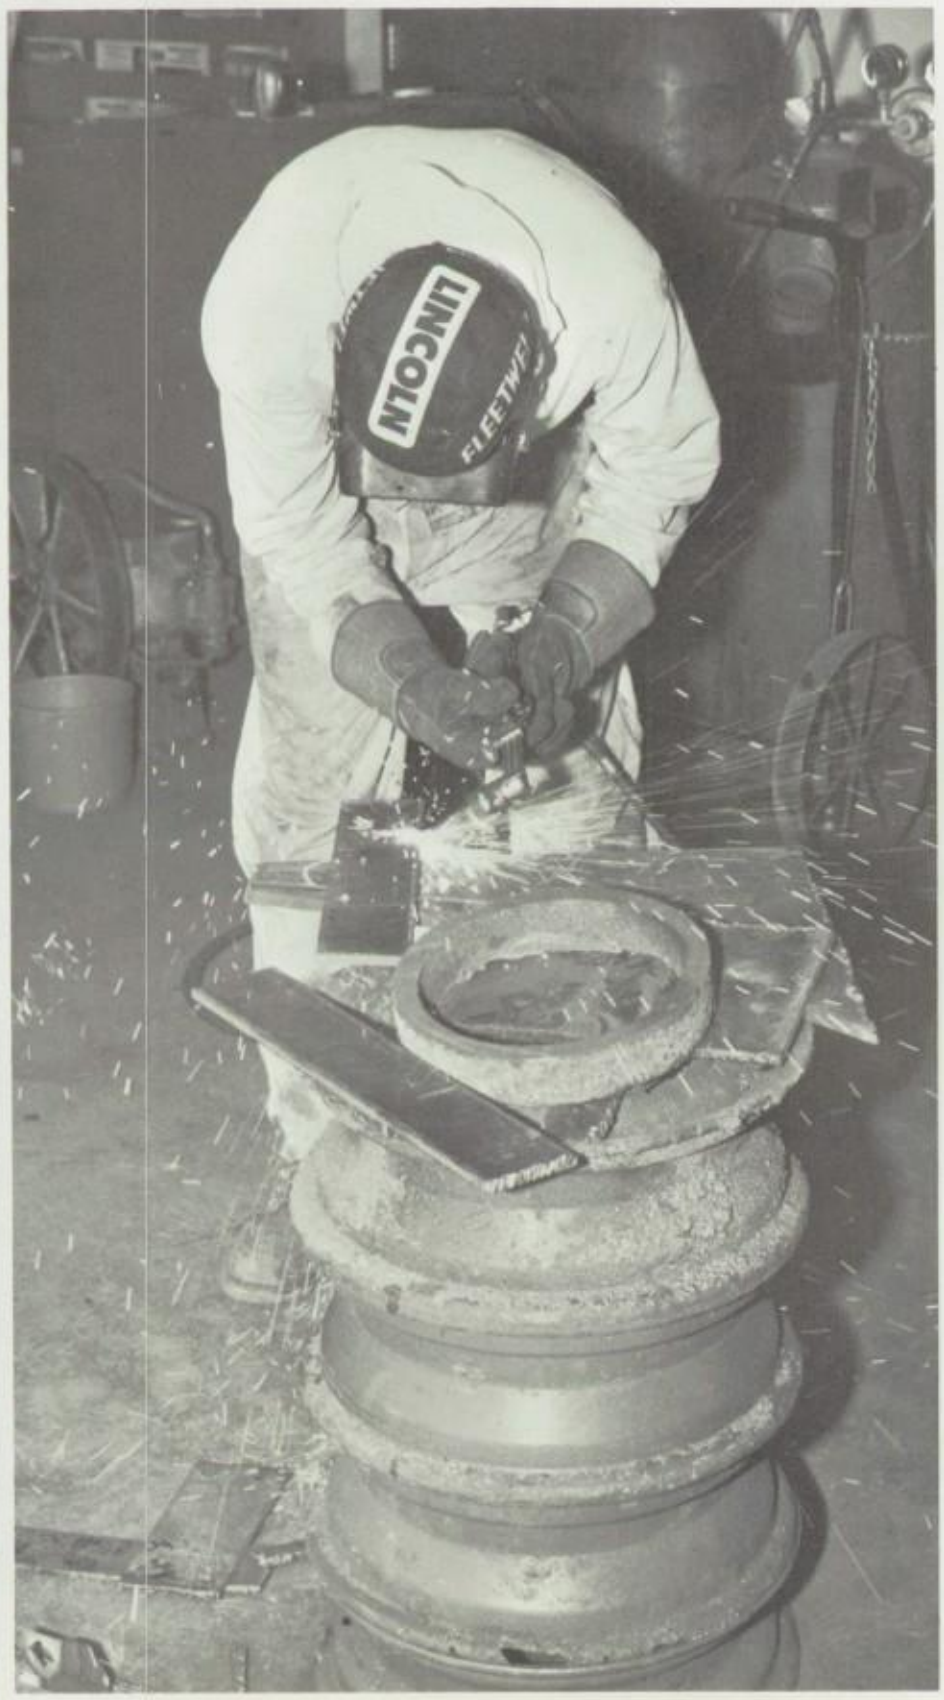
Seated: *Jeff Watson, Rich Stewart, Wilfred Wolfram, Jerry Hickernell, Randy Herring, Bill Stewart, Ron Gilliland, *Row II:* Rich Miller, Bill Peterson, *Norbert Miller, Chuck Walker, Gerald Graff, Steve Watson, *Jim Beres, *Row III:* Nick Heckman, Henry Fuller, *Jim Grapatin, *Larry Jackson, Chuck Marsh, Don Gilliland, *Dave Clawson

Welding

In this course a student is taught the fundamentals of fusing metals together by the use of heat and a fluxing material. He is instructed in the proper use and maintenance of acetylene (gas) torches, and electric arc welding equipment. He learns to cut metals into different sizes and shapes by using gas cutting torches.

He will learn to lay out and construct various types of horizontal, vertical, and overhead welding projects with all types of metals including stainless steel.

Safety will be stressed at all times in this course in order to prevent accidents from extreme heat and gas fumes that may affect one's health.



CO-OP

Seated: Mary Ann Wozniak, Kathy Heffern, Kathy Lippert, Norma Smith, Cheryl Williams, Carol Halsey, *Standing: L to R:* Theresa Bilich, Marlene Hamilton, Pat Karastury, Becky Brown, James Durasa, David Kiser, Mike Sammuels, Sharon McHenry, John Wilson, Teresa Walker, Marlehe Matteson, Pat Taylor

Administration

One of the factors that has made this a great nation is the ability of our people to effectively use their skills to produce both goods and services. There is a rapidly growing demand for skilled workers and technicians to meet this ongoing demand. Many employment opportunities that exist in today's economy did not exist as recently as ten years ago. Many job opportunities in future decades are not even known about in today's society. The implication here is to the effect that a person who learns a skill and grows with it may look to the future with rather good assurance that he need not be without a source of income and at the same time contribute to our nation's continuing growth.

Your training at the Crawford County Area Vocational Technical School was designed to help you develop skills, abilities, understandings, attitudes, and working habits necessary to become employable in your selected field of interest. At the same time, your training will provide interest in related fields of endeavor for which employment may be obtained.

It has been a distinct pleasure to help formulate this facility in cooperation with the various school districts and many members of our craft committees in order that you the students will be better prepared to enter the world of work.

MR. DONALD H. DICKEY, Director

MR. JAMES WATSON, Coordinator

I wish to congratulate the graduating Class of 1971. It is hoped that in fulfilling the obligations for your diploma, you have also obtained a sellable skill in one of our shop areas.

During the time spent here, you have been given the responsibility to conduct yourselves as adults. Your reactions, as indicated through your attention and application to work and instructor is commendable.

Good luck to all of you in seeking the ultimate goal for a successful and enriched social and economic life.

School Board

Row 1: Mr. William A. Agnew, Mr. Stephen Holowach, Secretary; Mr. Blair P. McCurdy, President; Mr. Hugh Miller, Mr. Charles E. Lowe, Vice President; Mr. William E. Carpenter, Treasurer

MR. HERBERT M. CULLEN, Guidance Director

We are completing the first three-year cycle of training in our programs. Steady growth in absorption of knowledge and skills has been maintained by the majority of the students. Sincere thanks to all of you for your excellent cooperation in making this a fine school. It is my hope that you have profited from your experiences while attending the Area Vocational-Technical School and continue to live up to the precedent you have established.

FUTURE FARMERS OF AMERICA

DISTRIBUTIVE EDUCATION CLUB OF AMERICA

STUDENT COUNCIL

DECA

The Distributive Education Clubs of America, otherwise known as DECA, is an organization whose program of leadership and development is designed specifically for students enrolled in Distributive Education.

This year students participated in fund raising projects, field trips, and District and State competition.

A. M. OFFICERS: Paula Bossard, President, Dawn Gruber, Secretary, Aleda Jenkins, Historian, Carol Engelhardt, Vice President, Cathy Furlong, Treasurer, Colleen Powell, Reporter

P.M. OFFICERS: Cecilia Pittsenbargar, Reporter, Debbie Phelps, Historian, Susan Fera, Treasurer, Pat Taylor, Vice President, Mike Samuels, President, Linda Rudler, Secretary

FFA Club

Our Future Farmers of America Chapter presently consists of twenty-six active members; the officers are as follows: President, Mary Ann Schultz; Vice-President, Judy Mukinhaupt; Secretary, Jeffrey Loper; Treasurer, Kenneth Rice; Reporter, Bruce Goeden; Sentinel, Thomas Gillette; Chapain, James McKinney; Advisor, Mr. Clifford Porter, Agri-Business Instructor.

Representatives of the Chapter plan to travel to Harrisburg, Pennsylvania to attend the Pennsylvania State Farm Show and receive the Charter for our chapter at the annual meeting of the Pennsylvania Association of the FFA, January 13, 1971.

Activities presently being carried out include monthly evening meetings so that both the A.M. and the P.M. groups can meet together, attending meetings of the Crawford County FFA Association, rat bait sales campaign with a goal of selling four hundred pounds of bait, yielding the chapter $80.00 profit.

Other projects for the rest of the 1970-71 school year include greenhand initiation, making and selling natural Christmas decorations, flower and vegetable seed sales — Vitality Seed Project, marketing potted plants grown from bulbs for the Easter season, as well as flower and vegetable transplants grown in the greenhouse.

The highlight of the year should be a Parent-Student Night with a dinner, short program, and Open House of our Agri-Business shop area.

Student Council

The function of the student council is to coordinate all activities of the students in the school. The Advisor is Mr. Gaydosh. Again this year, the student council took on the project of coordinating work involved in producing this yearbook. We hope you enjoy the product of their efforts.

Filling a desperate need in the community — a need created by a shortage of nurses — is the nursing course at Crawford County Area Vocational-Technical School. All graduates of the course — there have been three graduations so far — who wish to work have found employment. A few of the students enrolled in the classes to learn how to care for their own families. Places of employment range from hospitals through nursing homes to doctors' offices.

The one-year course begins with 16 weeks of preclinical instruction at the school from 8 a.m. to 3:30 p.m. Monday through Friday. During the final 32 weeks, the class gains practical experience at one of the two local hospitals, spending only one day a week in the classroom.

The clinical experience includes observation in the operating room and recovery rooms, a week in the physical therapy department and a week in the intensive care unit.

Nursing

"Tender Loving Care"

MRS. PATRICIA WAGNER, Coordinator

Hulse: Norman, Temperature: Norman

Definition of a graduate: "A trained practical nurse is a person prepared by an approved educational program to share in the care of the sick, in rehabilitation and in the prevention of illness, always under the direction of a licensed physician and/or a registered professional nurse."

Students must be at least 17, must be a high school graduate or must hold an equivalency diploma. Presently there is no tuition charge for residents of participating school districts. Beginning July 1, however, students will pay an estimated total of $125 to cover the cost of the program, plus the tuition fee. The charge will be made because of state policy regarding reimbursement for the program. The staff in addition to Mrs. Wagner, includes Mrs. Lois Budzinski, R.N., and Mrs. Louise Siefer, R.N., full-time instructors; and Mrs. Melvin Vaclavik part-time nutrition instructor.

MRS. LOIS BUDZINSKI

Adult

Adult educational opportunities are available in two categories. The Apprentice program is offered for accepted apprentices who desire to meet their related instruction requirements and the Evening Trade Extension classes provides for extension or supplemental development of performance skills. Apprentice classes are offered in the following courses: Shop Algebra, Shop Geometry, Drafting I and II, Shop Trigonometry, Compound Angles, Mechanics, Strength of Materials, Tool Design, and Metallurgy. Trade extension classes are offered in all fourteen of the shop areas including blueprint reading.

The day Alex Jablonski's big moment came. And went.

Jablonski's coach was willing. But Jablonski's Jacket zipper wasn't. Too bad.

With a Talon Zephyr® nylon zipper in his jacket, at least he could have been stopped on the field, instead of the sidelines.

The Talon Zephyr nylon zipper is strong yet lightweight. But, more important, it's designed not to snag, jam, pop or nip a potentially great career in the bud.

So, when your customer's big moment comes, whether it happens on the football field, the golf course, or just in the backyard, the Talon Zephyr won't choke up on him. Or let him down.

And it won't let you down either.

Advisor's Message

Another publication of the Countian has met with the printers ink and you have the pleasure of reviewing the happenings of a school year in pictures and print.

Thanks to the faithful students who helped make this yearbook all possible.

Sincerely,

George Gaydosh
